Village Profile

Village history

Gram Panchayat Sonakhan is a small village surrounded by forests where the birth place of Shaheed Veer Narayan Singh is ST dominated area whose main source of livelihood is agriculture and forest produce.

Chapter I: Executive Summary

Aims and Objectives of the ICRG Project

The United Nations Development Programme (UNDP) is kindly requesting you to submit your proposal to work closely with the local administration and the Community for ‘Supporting in implementation of Infrastructure for Climate Resilience Growth (ICRG) project in GP-Sonakhan, block-Kasdol, Dist-Baloda bazaar Chhattisgarh.

ICRG program aims to improve climate resilience of vulnerable people especially women and girls and support rural economic growth. The intended outcome of the program is improved resilience and productivity of the infrastructure built under MGNREGS.

The ICRG project is primarily aimed at building resilience of vulnerable rural communities to climate change impacts through convergence and scaling up of livelihood options linked to rural infrastructural development programmes including the Mahatma Gandhi NREGS. The project aims at piloting and demonstrating a model of planning and implementation of different rural development programmes activities in a climate informed and convergence mode – so as to enhance the overall livelihood and income generation capacities of rural communities.

ICRG Extended Phase

UNDP is implementing the extended phase of Infrastructure for Climate Resilient Program (ICRG) in six states: Chhattisgarh, Odisha, Bihar, MP, UP and Rajasthan. ICRG is a technical assistance program of DFID, UK with Ministry of Rural Development, Government of India, aimed at integrating climate concerns into the MGNREGS activities – piloting them at grass root level and building capacity of various stakeholders in the planning/ implementing value chain. The first phase of the ICRG programme (2016-2020) has had many successes like enhancing technical know-how among Block and District level MGNREGA PIAs and developing detail project reports for technically sound planning of NRM works considering climate change perspective and science. It also aims to enhance the capacities of vulnerable groups for addressing climate change risk through Mahatma Gandhi NREGA, the largest employment guarantee program of the world to provide safety net to poor HHs of rural area by providing them 100 days unskilled employment and creating durable assets.

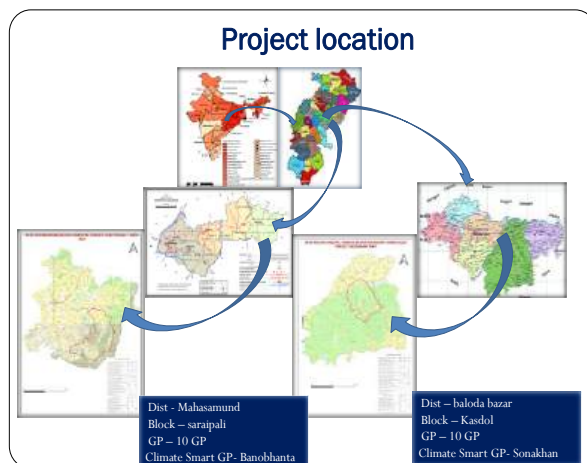

The project provided technical assistance to MoRD for propagating GIS based development plans for the GPs in the ICRG States. This was accompanied with capacity building and technical support to frontline functionaries in all blocks and provide handholding and back-up support through expert trainers.

The Work Plan for 2022-24 in the six ICRG states will have the following broad components:

1. Baseline and Vulnerability Studies,

2. Building the Capacity of Project Stakeholders,
3. Integrating of climate change considerations in NREGS planning and implementation
4. Support GIS based planning of GPDPs
5. Piloting of CRISP-M tool and building capacity of key stakeholders
6. Enhancing access to social protection schemes in conjunction with NREGS
7. Developing Climate Smart Livelihoods Plan/models & Piloting Climate Smart Village
8. Developing Knowledge Products and dissemination

Project Location

Geographical location of gram panchayat sonakhan North 21.5394N, 82.5746 E, South 21.4859 N, 82.5860E, East - 21.5083N, 82.6002E, West- 21.5078N, 82.5651E surrounded by forests on the west bank of Jonk river .Dist- Baloda bazaar ,Block-Kasdol ,Gram panchayat – Sonakhan ,village cover-1- Sonakhan,2- Kasoundi,3- Mahakam,4- Banglapali

Work plan in Chhattisgarh:

The activities planned during the extended phase, have been designed to scale up the success and lessons from the interventions of ICRG Phase I, with an increased focus on convergence between various rural development programs for enhancing the livelihood and income generating opportunities of vulnerable population:

- i. Improved access, interpretation, and analysis of climate risk information for permissible rural infrastructure in MGNREGS in order to make them climate resilient – use of tools like Climate Resilience Information System and Planning Tool (CRISP-M).CRISP-M has been developed in partnership with Madhya Pradesh Council of Science and Technology (CCOST), Raipur Chhattisgarh. The tool was pilot tested in 20 gram panchayats in Saraipali & Kasdol Block of Mahasamund & Balodabazar district of Chhattisgarh and it is proposed to be scaled up in the other ICRG states in a phased manner.
- ii. Improved capacities of Govt department functionaries at all levels to use climate risk information and management approaches in planning of rural infrastructure development programmes
- iii. Demonstrate convergence of various development initiatives in the State to improve their impacts and effectiveness towards building climate resilience of rural population through focus on individual and community livelihood structures and assets.
 - a. for example, dug-well, farm ponds, etc. built under MGNREGS can be converged with Shakambari scheme or Jaivik Kheti Mission etc. Similarly, goat shed constructed under

MGNREGS and goats can be provided from the veterinary department. The beneficiaries will be selected from the vulnerable section as per para 5 of schedule 1 of MGNREGA.

- iv. Project Unnati will be focused in all the selected GPs of selected blocks. Beneficiaries who have worked for 100 days will be given priority and through SRLM will be trained for the desired trades for sustainable livelihood so as to attain climate resilience.
- v. Emphasis will be given to work in the areas of priorities and identified deliverables of the MGNREGS, State government and MoRD such as the Amrit Sarovar mission, NGGB, CFP, etc.
- vi. At least one village in each district to be developed as climate smart village – to showcase contribution/benefits from MGNREGA for building climate resilience
- vii. Framework to be developed and capacities build to monitor and report the climate benefits of such rural development programmes including MGNREGS through special apps and portals/dashboard
- viii. Best practices and lessons will be documented – both as case studies and A/V products that will be shared with the other districts, States as well as with international audience.

Stakeholders and their responsibilities

All the **Woman**, small and marginal farmers, women's organizations, **self help group**, residing in the Gram Panchayat, all the beneficiaries under the Gram Panchayat, Gram Sabha are the stakeholders of this project, for whom the change in climate inside the Panchayat is affecting the lives of the people. Measures to avoid flood and drought and construction works can be made climate resilience so that the structures can be used for maximum time.

Chapter 2 : Study methodology-field area, sample, sample size, sampling methods

Project area selection

District Selection Process

Aligning to our mandate the two most vulnerable districts from the state have been chosen based on National Climate Change Vulnerability Assessment Report commissioned by Department of Science and Technology (DST, GoI)¹, which uses a set of 14 indicators to capture both 'sensitivity' and 'adaptive capacity' of districts and states to compare the vulnerability across districts in the country. Based on the vulnerability index, the two districts identified for ICRG Extended Phase are **Mahasamund** and **Baloda Bazar**. The blocks and GPs will be further selected based on consultation and guidance from the State Rural Development Department and the District/Block Administrations.

¹<https://dst.gov.in/document/reports/national-climate-vulnerability-assessment-report>

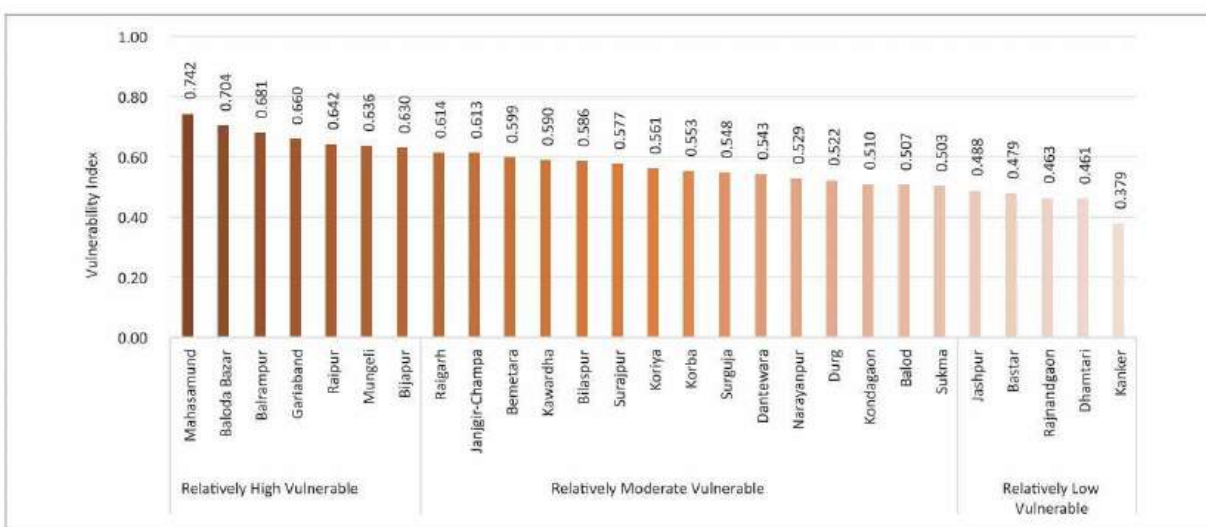

Figure: Vulnerability ranking of districts in Chhattisgarh (source: 'Climate Vulnerability Assessment for Adaptation Planning in India using Common Framework', DST, GoI, 2019-20)

Block Selection Process

The key criteria for selection of potential blocks are crucial for implementing the ICRG –EP project in terms of significance of the project and access the project to right beneficiaries. On the basis of discussion during the initiation meeting, while selection following key criteria for selection of blocks in two districts may be considered

- ❖ The block should be AAJIVIKA (NRLM) intensive block.
- ❖ The block must belong to Mission on Water Conservation (Water Stress block)
- ❖ Lowest total expenditure incurred in MWC block under MGNREGA during last three years.
- ❖ Lowest expenditure on Natural Resource Management in block.
- ❖ Lowest Person days generation during last three years in block.
- ❖ Low human development index.

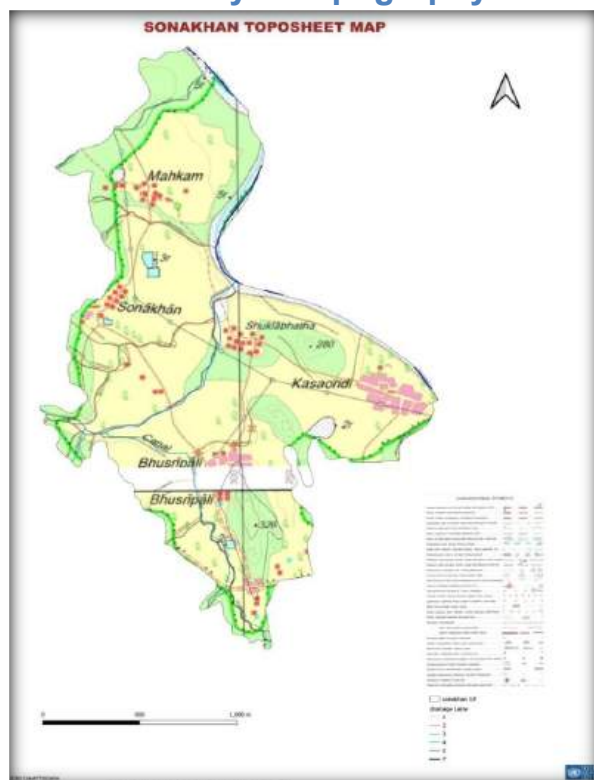

Gram Panchayat Selection Process

The ICRG project will implement in two Gram panchayat of each block of each district. After identifying the block, ten potential Gram panchayats have been identified in each block of the respective districts. The following criteria have been taken while selecting the gram panchayats:

- ❖ Highest number of active Job cards at GP level
- ❖ Highest number of active SC/ST workers/vulnerable community under MGNREGA
- ❖ Higher Women participation under MGNREGA
- ❖ Highest average expenditure in lakhs for three years
- ❖ Highest average Person days Generation for three years
- ❖ Number of Village organization, good number of SHGs under NRLM (to be discussed with NRLM local officials)

Based on the above data, after the online meeting with Assistant Project Officers and Program Officers, Baloda Bazar and Saraipali, on 15/10/2022, after the approval of District Panchayat Baloda Bazar's letter no./3504/dated 21/10/2022, selection of Gram Panchayats to be done .

Gram Panchayat Topography

Gram Panchayat Sonakhan is an area surrounded by hills, where the lower agricultural land is a flat area, in which farming is done by the farmers, which is a means of livelihood for them. Connected.

HH Survey 40% HH Selection

For the baseline survey of the project area, considering the ration card as the basis, to identify the poor families, landless families living in the village, the land holding families were identified from revenue.cg.nic and paddy was sold by them for income. Based on the data Food Civil Supplies and Consumer Protection Department <https://cgpaddyonline.co.in/> 40% families were identified for house hold survey.

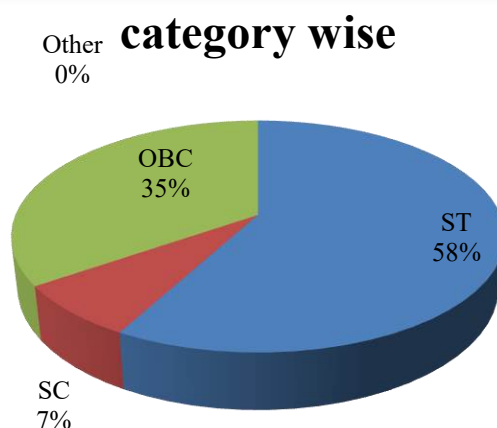

S.No.	Name of block	GP	Village	total HH	HH survey targeted	HH survey completed	%

Chapter 5 : Agri – ecology situation analysis-Rabi,Kharif,Summer Crop,Land use Pattern.

Climate Analysis

Catchment Analysis

Catchment Number	Area in Hact.	Outlet Geographysic Locatation	
		Latitude	Latitude
First	379	21.538085	82.580733
Second	128	21.521891	82.581318
Third	3589	21.518831	82.582876
Fourth	112	21.514099	82.59476
Fifth	243	21.508708	82.601111

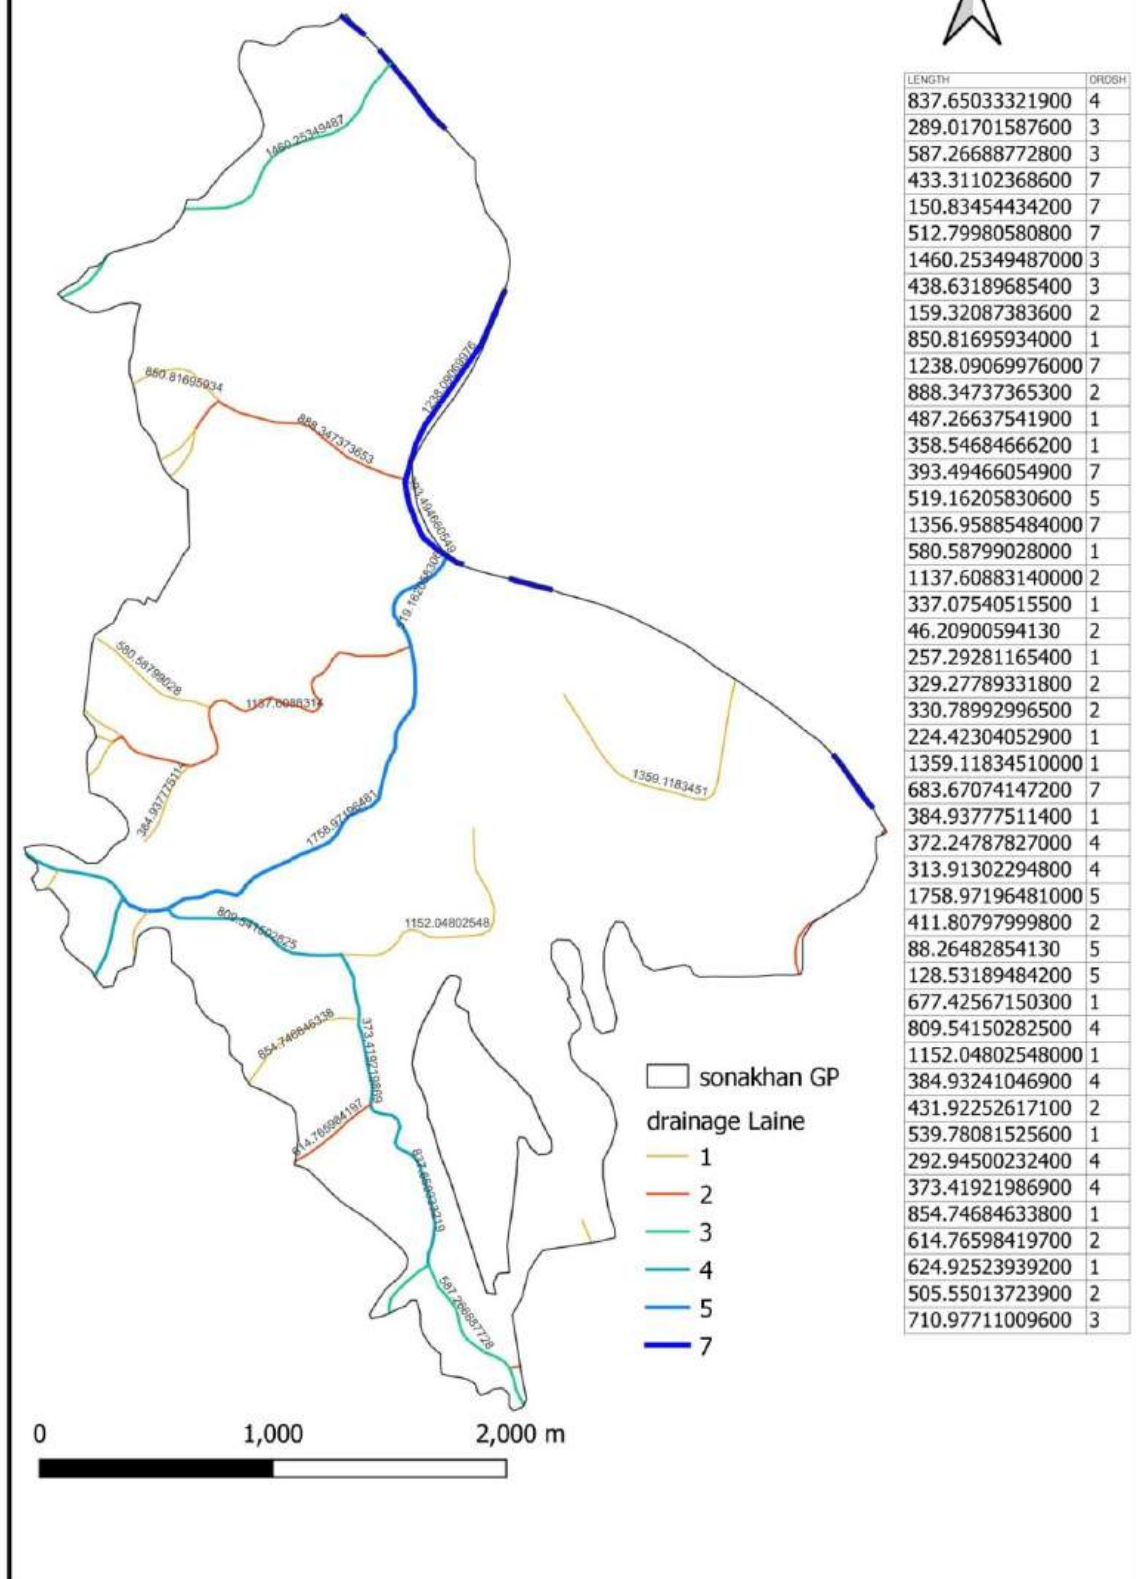

In gram panchayat sonakhan, the water flow starts from the maximum ridge point of SONAKHAN RESERVE FOREST at a height of 472 meter, in which the ridge point of the first catchment is 400 meter and the height of the velly point is 250 meter, whose height interval is 150 meter and length is 3.5 kilometer. Catchment area 379 hectare, the ridge point of the second catchment is 380 meter and the height of the velly point is 250 meter, whose height interval is 130 meter and the length is 1.5 km. The catchment area is 128 hectare, the ridge point of the third catchment is 472 meter and the height of the velly point is 250 meter. Whose height interval is 272 meter and length is 10 kilometer catchment area is 3589 hectare, ridge point of fourth catchment is 280 meter and height of velly point is 250 meter whose height interval is 30 meter and length is 0.75 kilometer catchment area is 112 hectare, of fifth catchment village The ridge point in the boundary is 300 meter and the height of the velly point is 250 meter, whose height interval is 50 meter and the length is 2 kilometer. The catchment area is 243 hectare, thus there are 5 catchment in sonakhan.

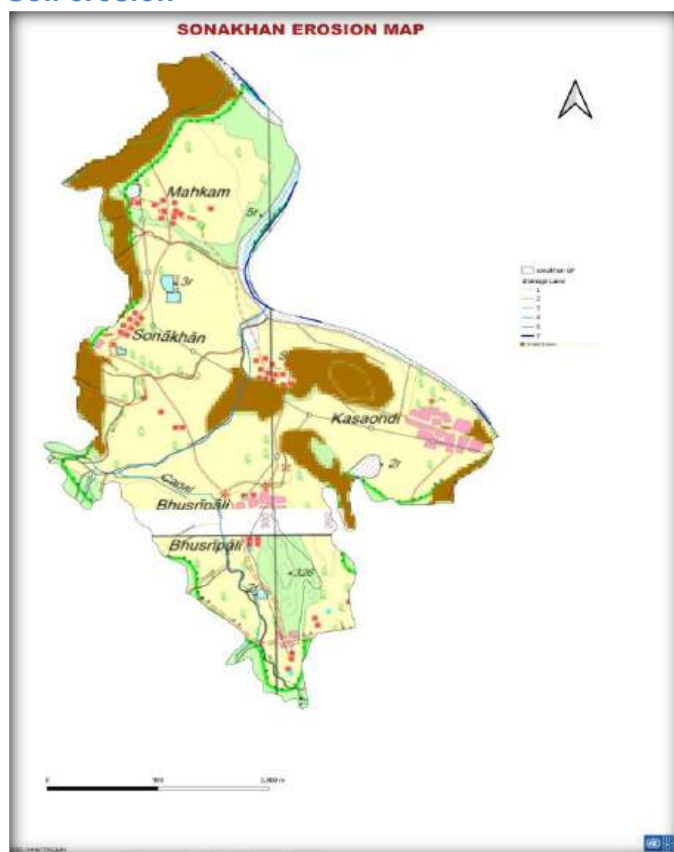

Drainage line Analysis

Sonakhan has a total of 14 drainage lines of the first order with a total length of 8.68 km, a total of 10 drainage lines of the second order with a total length of 4.85 km, a total of 5 drainage lines of the third order with a total length of 3.48 km, fourth order There is a total of 7 drainage lines whose total length is 3.38 km, Fifth Order has a total of 4 drainage lines whose total length is 2.49 km, Seventh Order has a total of 1 drainage line whose total length is 4.76 km which is the Jonk River which is Perennial and all other drainages Line is Dry.

LENGTH M	ORDER	TYPE	LENGTH M	ORDER	TYPE	LENGTH M	ORDER	TYPE	LENGTH M	ORDER	TYPE	LENGTH M	ORDER	TYPE	LENGTH M	ORDER	TYPE
851	1	Dry	159	2	Dry	289	3	Dry	838	4	Dry	519	5	Dry	433	7	Perennial
487	1	Dry	888	2	Dry	587	3	Dry	372	4	Dry	1759	5	Dry	151	7	Perennial
359	1	Dry	1138	2	Dry	1460	3	Dry	314	4	Dry	88	5	Dry	513	7	Perennial
581	1	Dry	46	2	Dry	439	3	Dry	810	4	Dry	129	5	Dry	1238	7	Perennial
337	1	Dry	329	2	Dry	711	3	Dry	385	4	Dry				393	7	Perennial
257	1	Dry	331	2	Dry				293	4	Dry				1357	7	Perennial
224	1	Dry	412	2	Dry				373	4	Dry				684	7	Perennial
1359	1	Undefined	432	2	Dry												
385	1	Dry	615	2	Dry												
677	1	Dry	506	2	Dry												
1152	1	Dry															
540	1	Dry															
855	1	Dry															
625	1	Dry															

Soil erosion

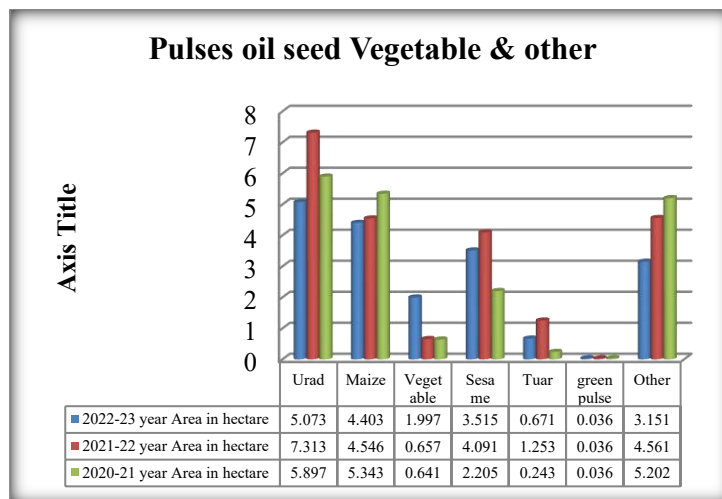

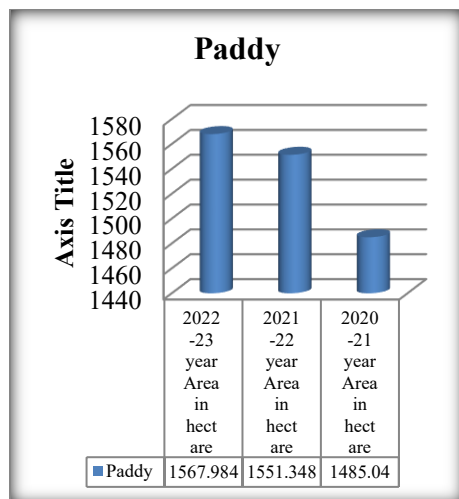

In gram panchayat sonakhan, sheet erosion is also visible in the ridge area and the forested area, because the land here has a high slope, as well as there is no means to stop the water and due to excessive erosion of the trees, the forest cover is sparse, which causes more runoff. Sheet erosion is taking place on those areas which need to be remedied, erosion is not visible due to slow runoff of water due to the made bunds on agricultural land fields. If seen in Sonakhan's gram panchayat boundary Only 15% of the area is affected by sheet erosion. Because of which accumulation of silt in low-lying agriculture and water harvesting structures is affecting water harvesting and crop production in planted fields.

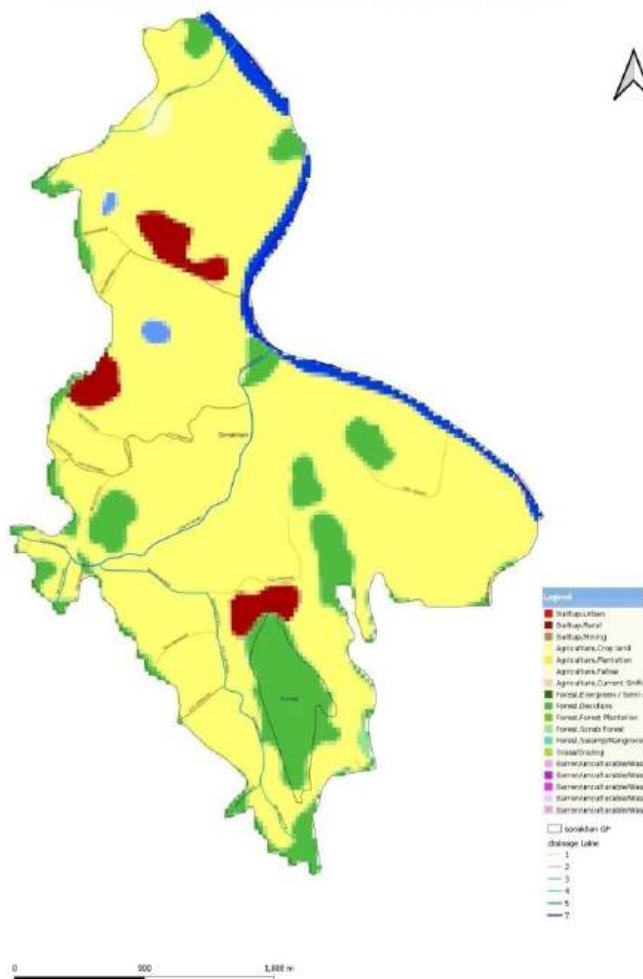

Crop Analysis

In Gram Panchayat Sonakhan, the area coverage of paddy and vegetables is increasing and the area of pulses and oilseeds seems to be decreasing day by day, due to which the support price of paddy is purchased by the government at a good price and the wasteland land / semi- wasteland land is converted into agricultural land. The area coverage of paddy and vegetables is increasing due to the work of land reform.

Name of Crop	2022-23 year Area in hectare	2021-22 year Area in hectare	2020-21 year Area in hectare
Paddy	1567.984	1551.3477	1485.0402

green pulse	0.036	0.036	0.036
Other	3.151	4.561	5.202
Total Area Area in hectare	1586.83	1573.8047	1504.6072

SONAKHAN LAND USE AND LAND COVER MAP

SONAKHAN TEBBIR

DATA SOURCES: https://datain.gov.in/gis/sonakhan/tebbir/sonakhan_tebbir_2018_2019

Chapter 6 : Climate Analysis

The data received from ISRO for the climate study has been used for the data from 2018 to 2022, according to the data received, the effect of climate change of Gram Panchayat Sonakhan is as follows.

Temperature

The temperature in sonakhan is 11.2°C in December 2018 and 42.10 °C in the highest month of May 2019, the heat is increasing day by day due to which human life is being affected very badly due to which birds are being affected badly in summer. Dying of thirst and heat.

Humidity

Sonakhan's humidity has been recorded highest at 89% in August 2019 and 2020 and lowest at 31% in May 2021.

Wind speed

Sonakhan's Wind Speed has been recorded highest 5.6 Km/hr in June 2020 and lowest 0.7 Km/hr in November 2018.

Cloud

Cloud of sonakhan has been recorded maximum 6-7 Okta in July, August, September and minimum 1-2 Okta in February March.

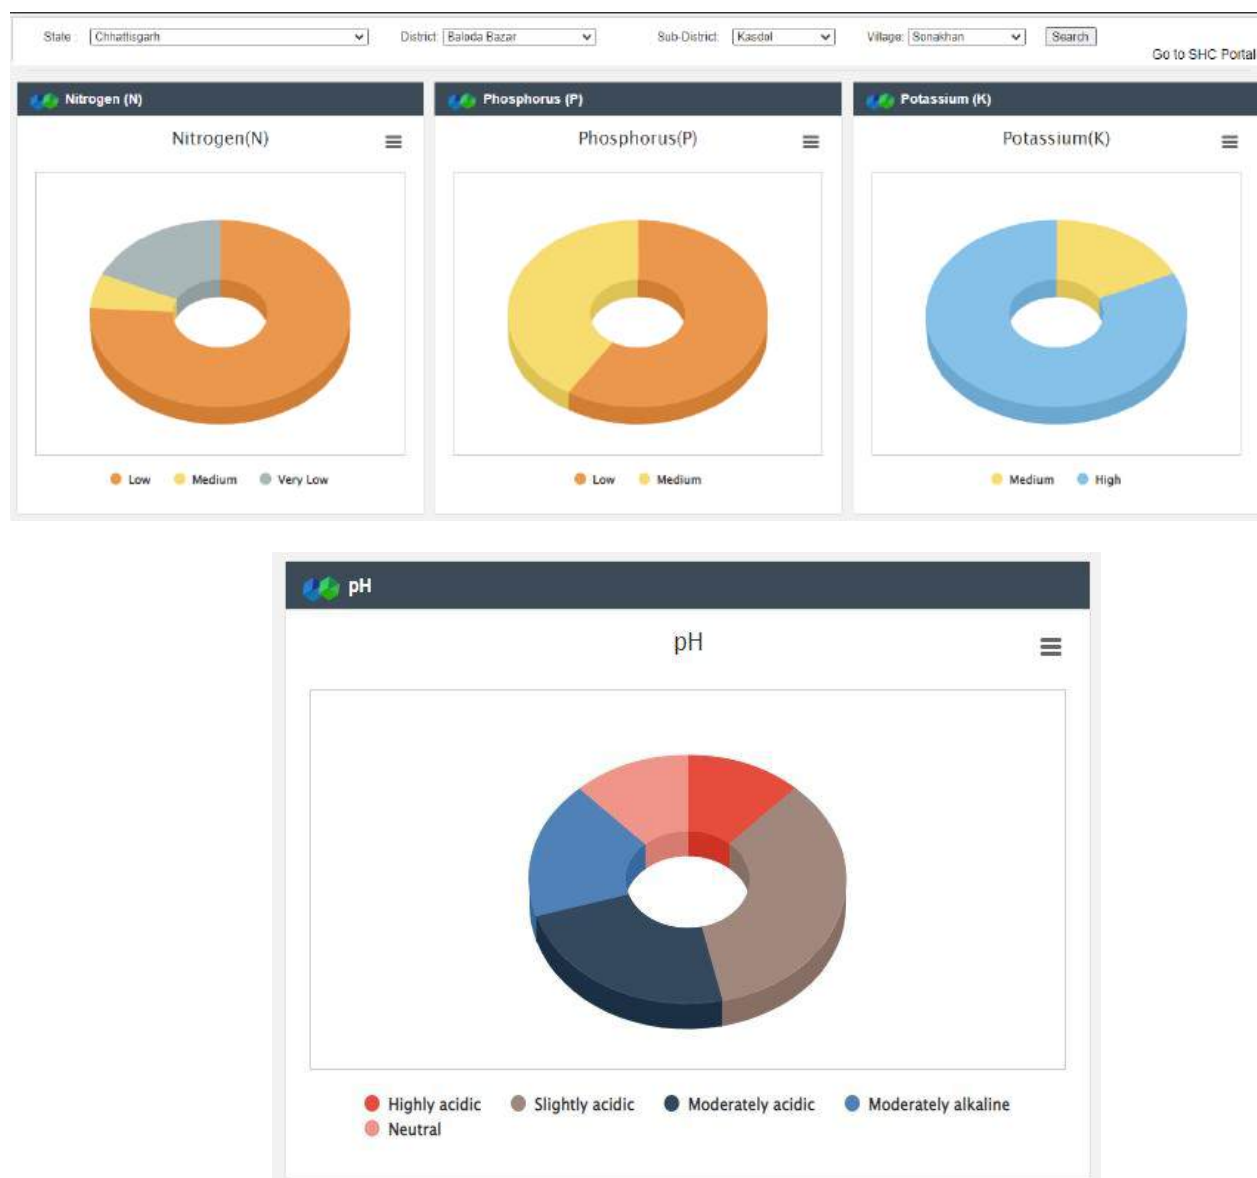

Ground Water Quality

1	Ground Water Quality	Pre-Monsoon	Post-Monsoon	Pre-Monsoon	Post-Monsoon	Pre-Monsoon	Post-Monsoon
2	YEAR	2014	2014	2014	2014	2014	
3	pH	8.31	7.62	8.5	7.96	8.02	6.53
4	TDS(mg/l)	794	709.6	854	817.8	681	597.1
5	HARDNESS(mg/l)	586.5	400	532.4	372	501.2	276
6	ALKALINITY(mg/l)	388.8	228	411.4	252	280.8	208
7	FLUORIDE(mg/l)	0.97	0.78	0.88	1.2	0.63	0.73
8	CHLORIDE(mg/l)	210	200	250	128	210	40
9	IRON(mg/l)	0.25		0.28		0.28	
10	NITRATE(mg/l)	43.98	5	55.38	10	28	25
11	SULPHATE(mg/l)	21.83		45.84		51.86	
12	WATER QUALITY	Potable	Potable	Potable	Potable	Potable	Potable

Ground water quality has been observed to be less and more in the constituents of water in pre-monsoon and post-monsoon, but the water of Gram Panchayat Sonakhan has been found potable in all seasons.

Soil Nutrient Status

Soil Nutrient in gram panchayat sonakhan is deficient in nitrogen, deficient in phosphorus, deficient in potassium, slightly acidic area is high in Ph and neutral area is the least, on which work needs to be done.

Chapter 7: Capacity Building and Training Measures

In order to avoid the changes in the climate, all the stake holders are being given training in this regard, from the village level to the district and district panchayat staff, so that how to reduce the changes in the climate and construction work can be done. Efforts are on on how climate reselance work can be done.

Chapter 8 : Response and Relief measures

In MGNREGA, emphasis is being laid on getting more and more NRM and plantation works done and an action plan has been prepared on how to connect people with livelihood by identifying the factors that emit more carbon

in the Gram Panchayat. So how can climate change be reduced by making people aware and working in the project area.

Chapter 9 : Financial Resources for implementation Proposed work

All work is to be done through convergence, in which NRM, animal shed and plantation from MGNREGA, solar pump from CREDA, fisheries from fish department, sprinkler drip and farming work from agriculture and horticulture department, smokeless chulha for carbon credit from Blue Earth Company. Action plan has been drawn up with

Rural development

Soil helth checup centure

For the deteriorating soil health of Gram Panchayat Sonakhan, it is proposed to set up a soil testing center in collaboration with Agriculture Department and Krishi Vigyan Kendra in Sonakhan so that soil health can be improved.

Chapter 10: Impact Assessment

Plan has been made to reduce wastage of water in Gram Panchayat Sona Mine, reduce electricity consumption, maximize NRM works and reduce carbon emissions in cooking food from homes and maintain soil health, thereby claimate The means of sustainable livelihood can be increased while reducing the effect of change.
